Weather Forecast

Wind Speeds

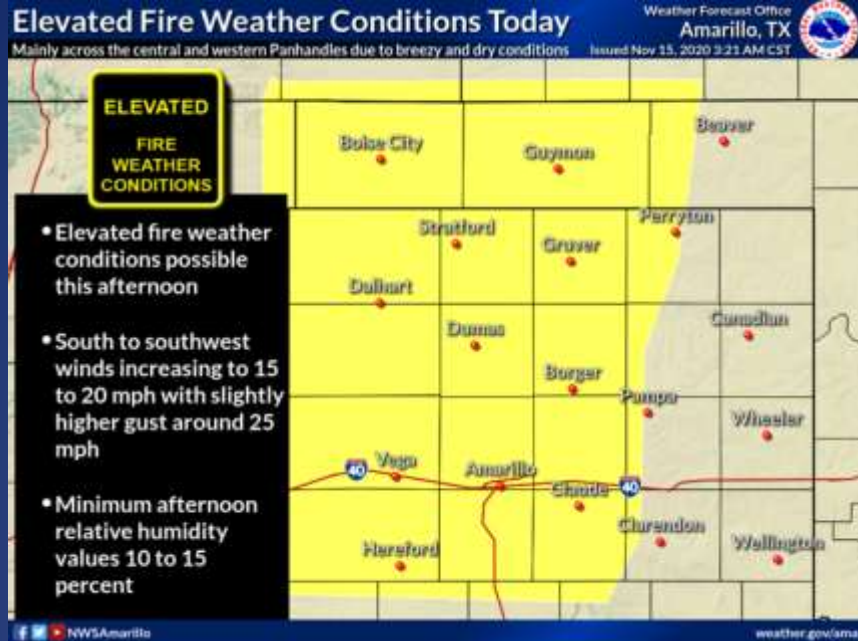

Gusts

Hazardous Weather

Hazardous Weather

Elevated fire weather conditions will be possible today mainly across the central and western Texas and Oklahoma Panhandles. Breezy south and southwest winds 15 to 20 mph with gusts near 25 mph along with minimum afternoon relative humidity values of around 10 to 15 percent under sunny and dry conditions will lead to the increased fire danger this afternoon.

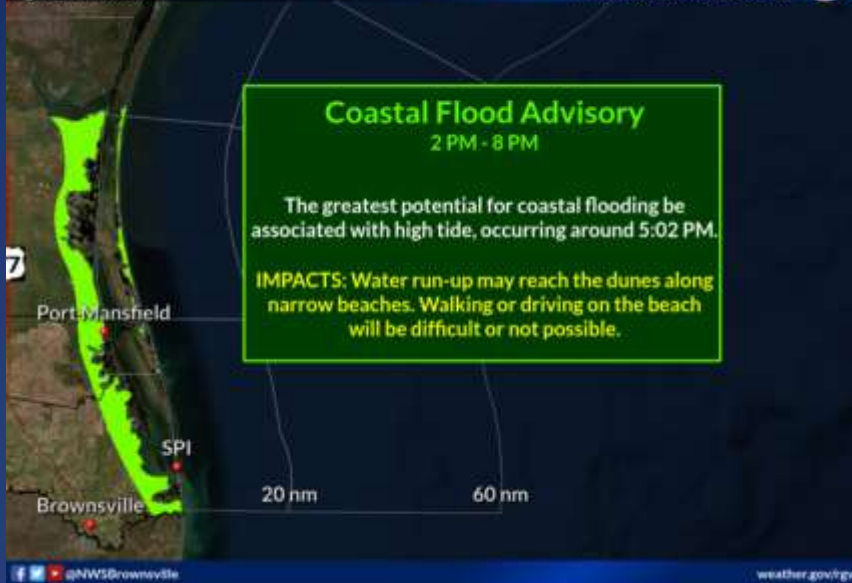

Elevated fire weather conditions are expected this afternoon across the Guadalupe Mountains.

Hazardous Weather

Minor coastal flooding this afternoon

High tide at 5:02 PM

Weather Forecast Office
Brownsville/RGV, TX
Issued Nov 14, 2020 11:55 PM CST

Minor coastal flooding will be possible this afternoon. A coastal flood advisory is in effect from 2 PM to 8 PM. The greatest potential for coastal flooding will be associated with high tide, occurring around 5:02 PM. Water run-up may reach the dunes along narrow beaches. Walking or driving along the beach will be difficult or not possible.

Elevated Fire Weather Concerns Today

Weather Forecast Office
Houston/Galveston, TX
Issued November 15, 2020 4:09 AM CT

A cold front will move through the area this morning bringing in much drier air into the region. These very dry conditions combined with lingering elevated winds behind the front will lead to potentially dangerous fire weather conditions during the late morning & early afternoon. Please use safe burning practices and do not burn if you are in a burn ban.

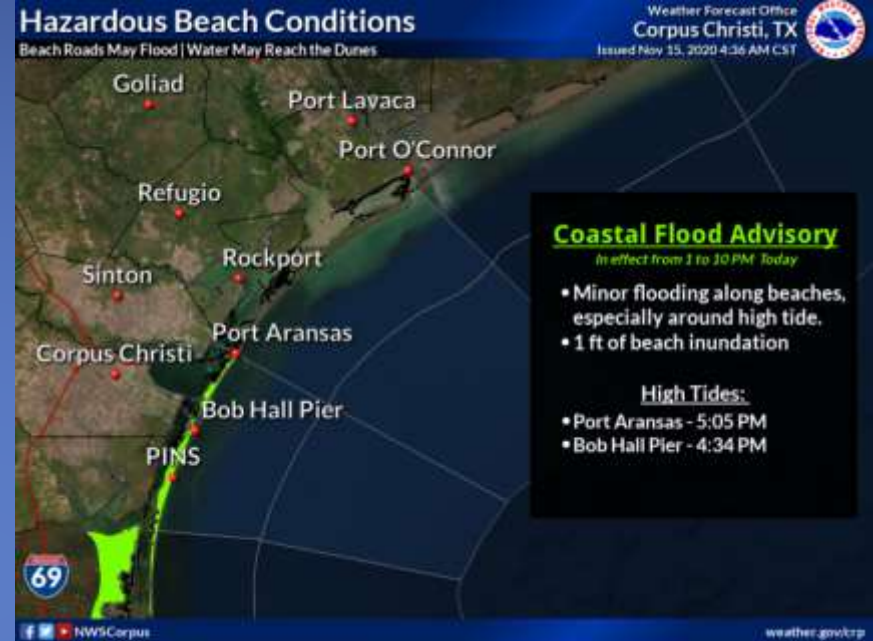

Breezy and very dry conditions will lead to elevated fire danger this afternoon.

Hazardous Weather

A cold front will move through the area this morning, bringing along strong extremely dry north to northeasterly winds behind it. Isolated showers and thunderstorms are possible ahead and along the front this morning and early afternoon, with skies clearing quickly behind it by mid afternoon. An Elevated Fire Danger threat is in place today across South Texas with RH values 12 to 25 percent. Highs will be near normal.

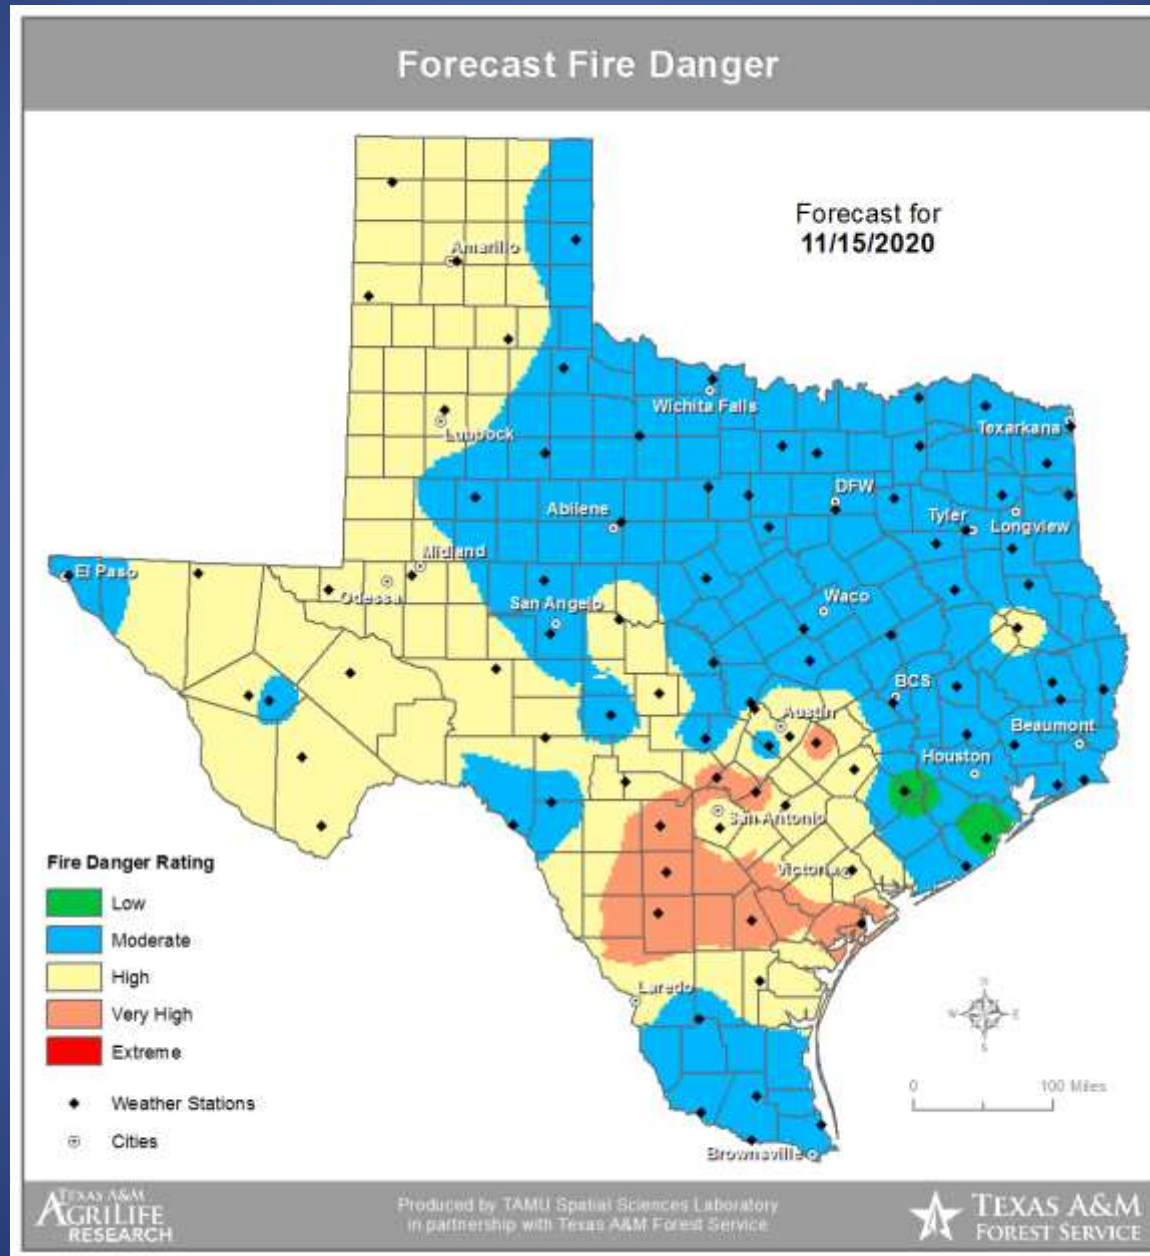

A Coastal Flood Advisory is now in effect from 1 PM through 10 PM tonight for Gulf-facing beaches, south of Port Aransas. Water will reach the dunes around time of high tide and cut off beach access roads.
